

M + M Organic Farms, LLC is located in South Central Wisconsin. The land we farm has been chemical-free for 22 years. We started our first certified organic flock of 1,000 birds (laying hens) in 1997. We now have 7,000 certified organic laying hens.

Our hens are fed all organic feed, have access to pasture in spring, summer, and fall, have adequate natural lighting and plenty of room to scratch, peck, and dust-bathe. A lot like these chickens we remember in Grandpa and Grandma's barnyard. ~ A happy contented hen!
